IOHANNIS CHRONICON VENETUM.

tantum adversum Narsetem commotus, ut statim in Vitiam Longinum praefectum mitteret, qui Narsetis locum teneret.
Narsis vero his cognitis valde pertimuit, et tantum maxime ab eadem Sophia augusta territus est, ut egredi iam ultra
Constantinopolim non auderet. Cui illa inter caetera pro eo quod erat eunuchus ita suadulverat, ut eum puellis in
gynicio tuarum fereret pensis dividere. Ad quae verba Narsis dicitur haec responsa dedisse, talem se eidem telam
ordituruus, qualem ipsa dum viveret deponere non posset. Itaque odio metuque exagitatus, in Neapolim Campaniae
civitatem secedens, legatos mox ad Longobardorum gentem direxit, nundum ut pauperrimus terrarum relinqueret et ad
Vitiam cunctis rapletum divitiis possidendam veniret. Simulque multitudo pauorum generis, aliarumque rerum species
quarum Italia ferax est misit, quatinus eorum ad veniendum animos posset illicere. Longobardi legata annexa et quae
ipsi praeoptabant gratanter suscipiunt, deque futuris commodis animos attollunt, et egressi cum Alboin rege suo, Vita-
liam possessuri adveniunt.
Eodem tempore Romanam ecclesiam vir sanctissimus Benedictus papa regebat. Aquilegensi quoque civitati eius-
que populo beatus Paulus patriarcha praeerat; qui Langobardorum rabiem metuens, ex Aquilegia ad Gradus insulam
confugit, secumque beatissimi martiris Hermachorae et ceterorum sanctorum corpora quae
ibi humata fuerant deportavit, et apud eundem Gradensem castrum honore dignissimo
condidit, ipsamque urbem Aquilegiam novam vocavit. In quo etiam loco post paucum
tempus Helyas egregius patriarcha, qui tertius post Paulum regendam suscepit ecclesiam,
ex consensu beatissimi papae Pelagii, facta synodo 20 episcoporum, eandem Gradensem
urbem totius Venetiae metropolim esse instituit. Ad cuius roborem Heraclius post
haec augustus beatissimi Marci sedem, quam dudum Helena Constantini mater de Alex-
andria tulerat, sanctorum fultus amore direxit. Ubi et actenus veneratur pariter cum
cathedra, in qua beatus martir sederat Hermachoras.
At vero dum essent revoluti anni ab incarnatione Domini quingenti quadraginta

The Fragmenta membranea collection

The Fragmenta membranea collection at the National library of Finland contains the v
books written and used in the eastern parts of medieval Sweden, the Diocese of Turk
database contains 9,319 digitized parchment leaves meaning 18,638 pages which c
different medieval manuscripts.

The leaves in the collection come from books that were confiscated by the Crown in t
centuries. These were then unbound and the loose leaves were reused by the central
bailiffs' account books. Because of this most of the leaves have not only medieval co
bailiffs and the administration in the sixteenth and seventeenth centuries. The parchm
