

INTERDISCIPLINARY AFTERNOONS

Where: Think Company, Latokartanonkaari 3, Viikki

When: December 20th from 15.00-17.00

Topic Of The Month: MICROBIOTA & IMMUNITY

Do you have an interdisciplinary research idea? Would you like to get expertise from other divisions to help? Would you simply like to know what's going on in other groups in your faculty? If you answered "yes" to any of these questions, the series of **Interdisciplinary afternoons** is for you.

The series is organized once a month. The aim is to offer a place and a time for brief presentations and brainstorming about new, interdisciplinary ideas and collaboration opportunities across disciplines and possibly with organisations and companies outside the university. This is an opportunity for different groups and divisions to bring to the table a topic that they need other groups' expertise for. Themes that have already been mentioned include FISH, MILK, FOOD, ARTIFICIAL INTELLIGENCE, SENSORS, MICROBIOTA & IMMUNITY.

The first event will take place on December 20th and the topic will be MICROBIOTA & IMMUNITY. You are warmly welcome to join!
