Jukka Parviainen

Project 'Student care and support'

- In spring 2010 Teaching and Education Evaluation (TEE) project was done at the Aalto University which produced information for developing teaching and education.
- As a result the ongoing project 'Student care and support' was launched. Two new persons were hired to the project.
- The project was one of strategic initiatives in autumn 2012 at the Aalto University School of Science (Aalto SCI).
- The aim of the project is fundamentally oriented to students, their studies and their well-being and creating practises to support them. The project covers both student and teacher side support, and combines them in tutoring

Good practises of student engagement

- 1) Orientation to studies
- 2) Advancing personal study skills
- 3) Students' well-being
- 4) Monitoring students' progress of studies
- 5) Advancing learning community by students
