

How to use Xournal++ for drawings and calculations?

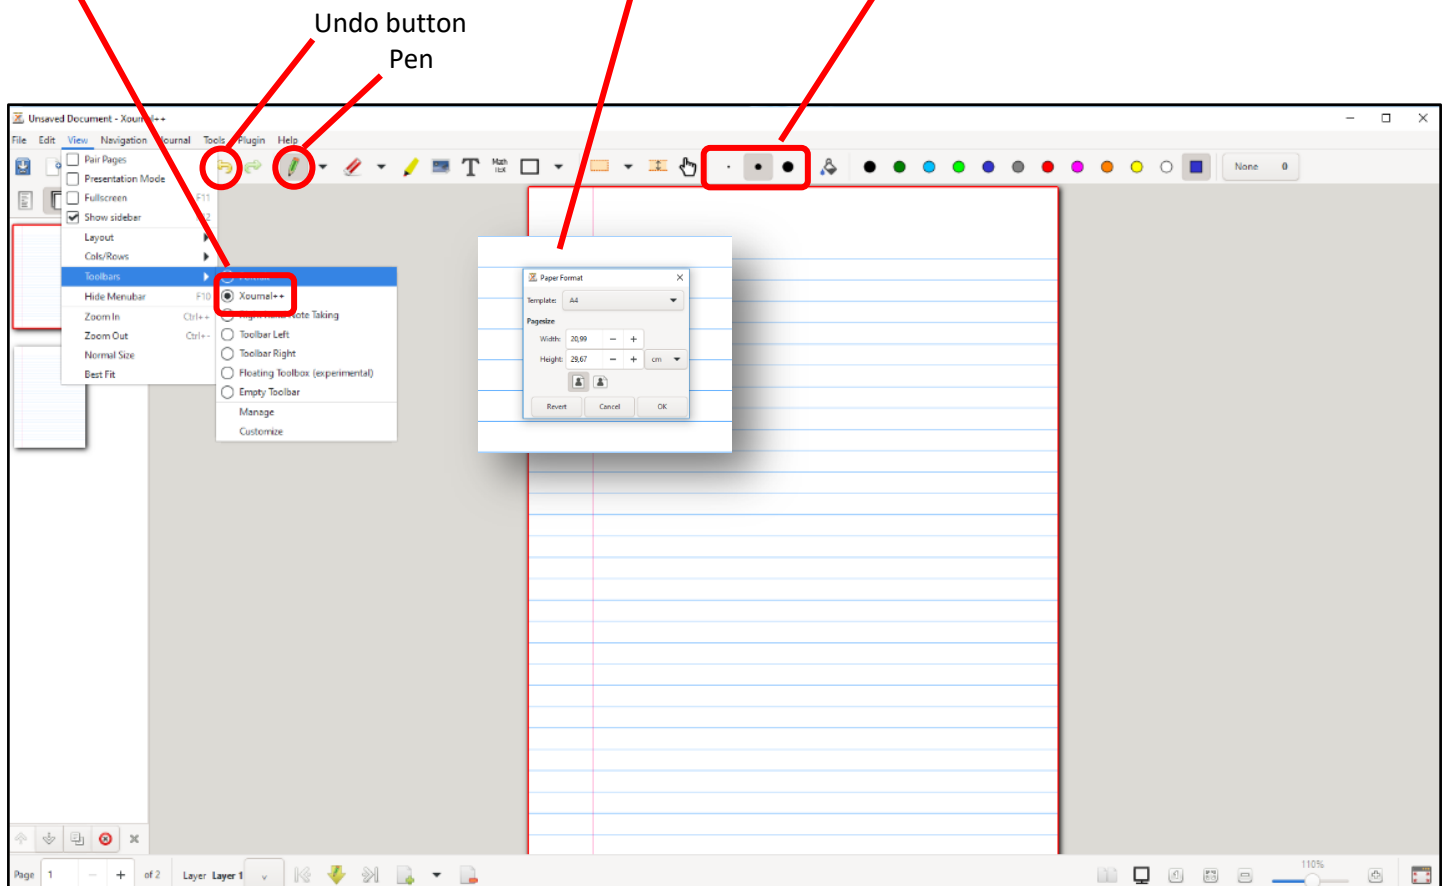

Examinarium

Change toolbar:

Open View > Toolbars and select "Xournal++".

Modify paper size: If you need a larger page, go to Journal > Paper Format to change the width and height of the page.

Pen tip size: Open Tools > Pen Options or toolbar for adapting the pen size.

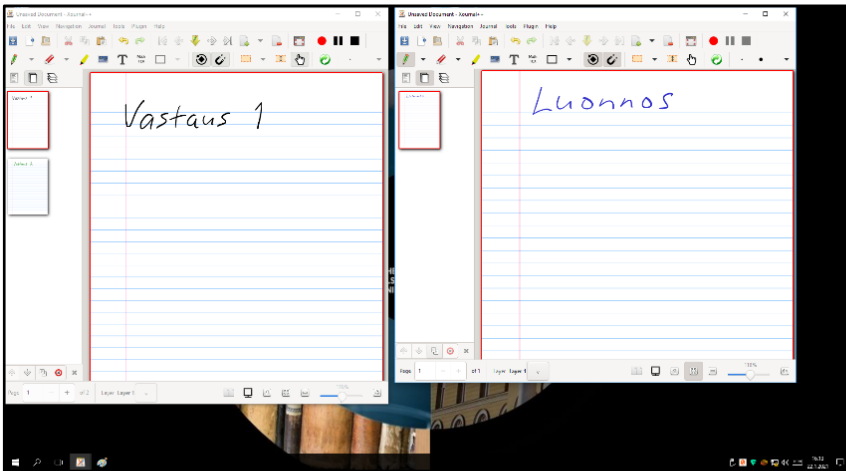

Undo button
Pen

Layers: Select "show all" to make all content visible.

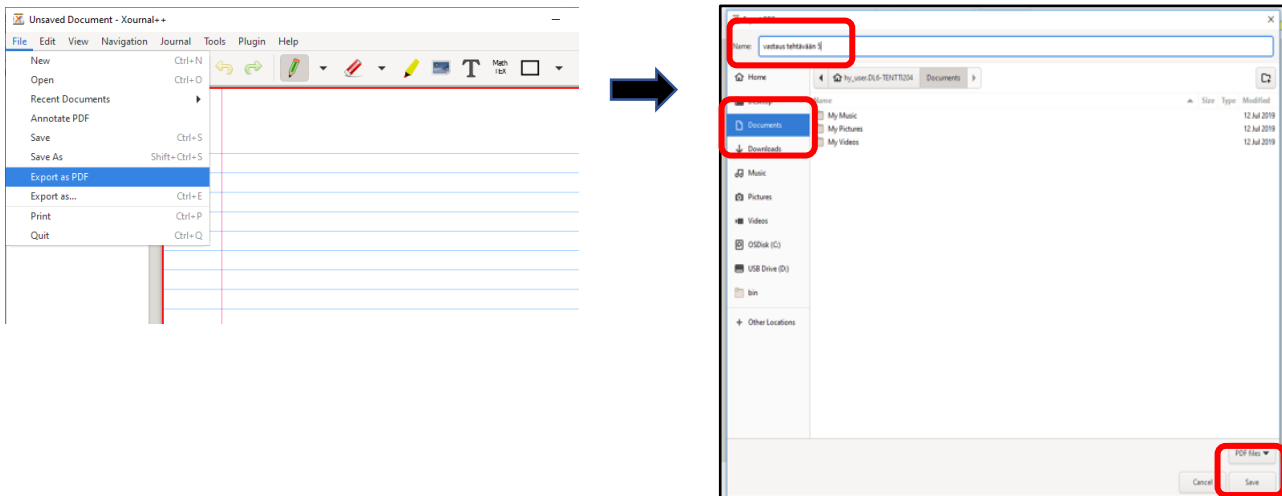

Add a page: click on the plus button (visible if "Xournal++" selected as toolbar) or Journal > New Page Before/After/at End.

Background: Each page may have a blank or patterned background. Select with this button (visible if "Xournal++" selected as toolbar) or go to Journal > Page background.

Two files aligned: If needed, you can open Xournal++ twice, for drafting your answer first in one window before copying it to the file to be submitted.

Saving a file: It is a good idea to save your work several times during the exam. At first, select Export as PDF from the File menu, select Documents as the folder, type in a name for the file, and click on Save.

Attaching the file: Remember to add your file as attachment to your answer in Examinarium, in PDF format and within the exam time.

You will find the file in the folder where you exported it (Documents).
