Revita: Language learning—FI, DE, RU, ...

Key ideas:

- Focus on variety of linguistic skills: exercises for reading, understanding, writing, grammar, and vocabulary (audio—future work)
- For intermediate to advanced levels: beyond the beginner level
- Engage learner in active production of language—rather than passive memorization
- Generate exercises automatically from arbitrary, real texts chosen by learner
 - Own material motivates the learner to engage in the learning process longer
- Translation relevant on many levels to e-learning for language
