Variety of login options

University users:

If you do not have university IDs:

Manual login

Forgotten your username or password?

[Accessibility statement](#)

DigiCampus is a shared learning environment for universities, where you will find common courses for universities, courses open to everyone and the universities' own courses.

For full access to this site, you first need to create an account.

[Create new account](#)

Some courses may allow guest access

[Access as a guest](#)

- Tampere University of Applied Sciences (TAMK), Finland
- University of Derby (UoD), UK
- University of Masaryk (MUNI), the Czech Republic

The courses are running from 6 March to 26 May 2023.

Category page in DigiCampus for VERSATILE EU project

An Erasmus+ project by four institutions:

- Hochschule Rhein-Waal (Germany)
- Tampere University of Applied Sciences (Finland)
- University of Derby (UK)
- University of Masaryk (Czech Republic)
- Most of the students signed into DigiCampus with their federated home university credentials.
- The rest of them used Google of manual sign-in option.
- An enrolment key was used for the courses.
- Project website: <https://versatile-erasmus-project.eu/>

Do not expect an LMS to do this

- Create study rights for the cross-institutional students in another university's official registry.
- Create Transcripts of Records or Certificates for the students.
- Include or accept the cross-institutional studies into a student's personal study plan.
- Transfer the ECTS credits from one university to another.

”

In international cross-institutional collaboration, a learning platform (LMS) will not replace the official study information system.

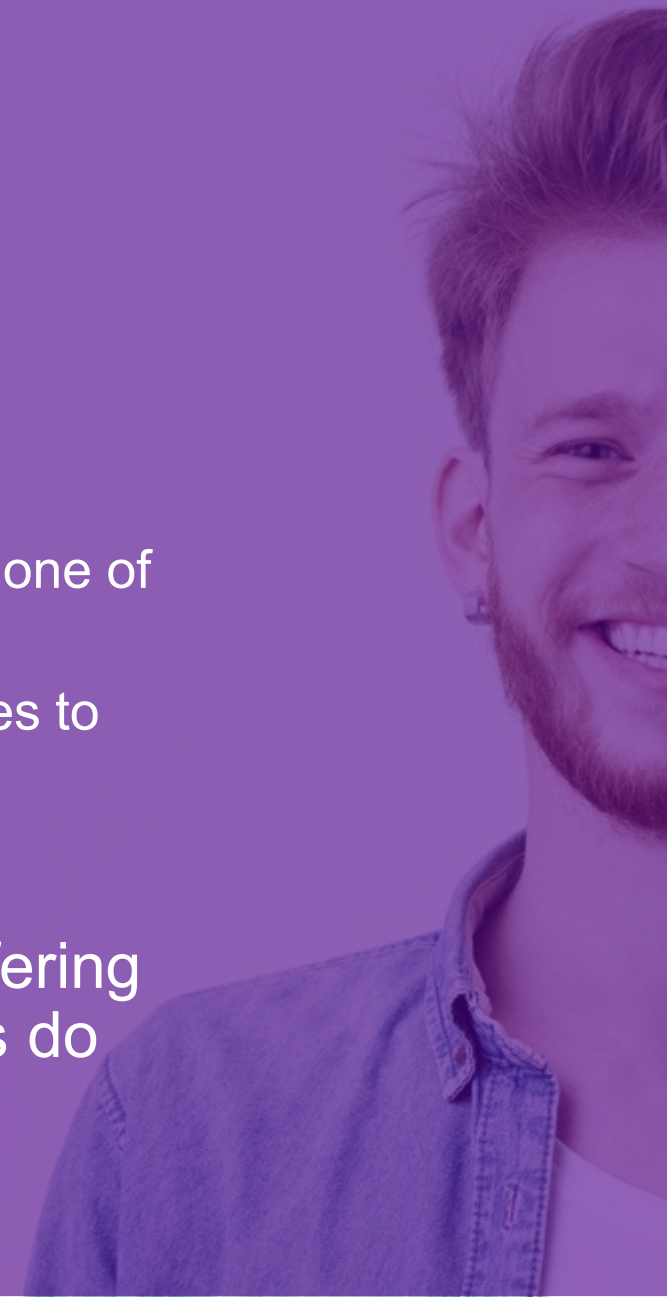

Conclusions

DigiCampus facilitates collaboration in cross-institutional studies

1. DigiCampus.fi offered a neutral and practical solution for different international universities to offer their studies cross-institutionally, as none of the institutions used DigiCampus as their regular LMS.
2. DigiCampus offered an easy way for students from different universities to sign into the LMS, due to a variety of sign-in options.

Need for an open access LMS

A need for an alternative LMS exists for many universities. Offering MOOCs is a typical case. The proprietary LMSs of universities do not always allow an easy access for students from another university.
