

CoLact workshop in Helsinki, 23-24 April 2012: Programme

Monday the April 23 rd 2012 <i>Fabiansgatan 33, second floor, Lecture hall 1</i>		
12.00	Registration & Lunch	
13.30	What is CoLact all about?	C Knight
14.20	Milk and dermatitis	
	May human milk be used as a treatment option in atopic dermatitis? - A randomized, controlled pilot study	L Berents
	Udder cleft dermatitis in a Danish dairy herd	M Mosborg Nissen
15.00	Coffee	
15.30	Measuring milk	
	Differences in milk composition and individual cheese yield from milked and/or suckled Swedish landrace goats	M Högberg
	Effect of ruminal infusions of cobalt-EDTA on milk fatty acid composition and mammary lipogenic gene expression in lactating cows	K J Shingfield
	Polyamines in Human Milk	M A Ali
	Active secretion of chemicals in milk by transport proteins in the mammary gland	A Oskarsson
17.00	End of programme	
Evening	CoLact networking dinner	

Tuesday the 24 th of April 2012 <i>Fabiansgatan 33, second floor, Lecture hall 1</i>		
09.30	Environment affects lactating cows	
	Bulk milk investigations of Streptococcus agalactiae in Swedish dairy herds	K Persson Waller
	How does acute mastitis affect cow behaviour?	L Hänninen
	The effects of sleep-awake and light-dark changes on endocrinology and milk production in dairy cows	S Ferneborg
10.30	Coffee and speed-dating for research collaboration	
11.30	CoLact research collaborations: Report on the "Human mastitis action point"	C Knight
12.00	Lunch	
13.00	When lactation starts...	
	Attitudes among health staff – implications for breast-feeding mothers	E Kylberg
	Oxytocin and vasopressin systems, mother-child attachment and child's stress reactivity in the developing brain	S Hakonen
	Influence of Farrowing Environment on Early Lactation Performance and Oxytocin Level in Pigs	J Yun
	Title to be added	D A Slattery
14.40	Coffee	
15.00	Effects of diet on lactation	
	Effect of prepartum diet energy content on insulin resistance of dairy cows during periparturient period	S Salin
	Glucogenic versus lipogenic supplements to dairy goats – effect on energy status, fat metabolism, gene expression and milk quality throughout lactation	M Eknæs
15.40	Future meeting & PhD course themes & locations	C Knight
16.00	Break	
17.00	Public plenary: The lactating brain and oxytocin	K Uvnäs Moberg
19.30	Get-together with the PhD course participants
