<https://elomake.helsinki.fi/lomakkeet/29364/lomake.html>

The program includes plenaries, workshops and most importantly student presentations and posters. The theme is Translational Veterinary Medicine., and to this end the organizers are very pleased to introduce two internationally well-recognized speakers in the field: Professor **Hans-Peter Lipp** from the University of Zurich will elucidate relations between genes, brain, behavior and evolution in laboratory and wild-living species, and Professor **Wolfgang Sipos** from the University of Veterinary Medicine in Vienna will talk about translational aspects of immunology in clinical veterinary medicine. It is a very rare occasion to have two such a high-profile speakers in our seminar so all our students are strongly encouraged to attend!

Student oral presentations (about 15 min) and posters along with English abstracts (300 words) are invited. The deadline for abstract submission is 8.9.

Abstracts are to be submitted through this link

<https://elomake.helsinki.fi/lomakkeet/43674/lomake.html>

You can reuse abstracts that are already presented or will be presented, so the work does not need to be original. The abstracts will be peer reviewed and presented in an abstract booklet and there will be a prize for the best abstract. If you need a grant for traveling please send an application to coordinator before 8th of September. All the student members of ANIWEL graduate school are expected to attend the seminar and 1 credit can be achieved by attendance and own presentation
