TAJUA project – models for supporting open scholarly publishing

Esa-Pekka Keskitalo <firstname.lastname@helsinki.fi>

Infrastructures and Networking for Open Science
30.8.2016, University of Helsinki

OPEN ACCESS MUST BE

OPEN NOW

OPEN FOREVER

OPEN FOR REAL

- **Right now**: easy and affordable for researchers
- **Forever**: over changes in people and organizations
- **For real**: without technical and legal hinders of use

Toward Better Open Access

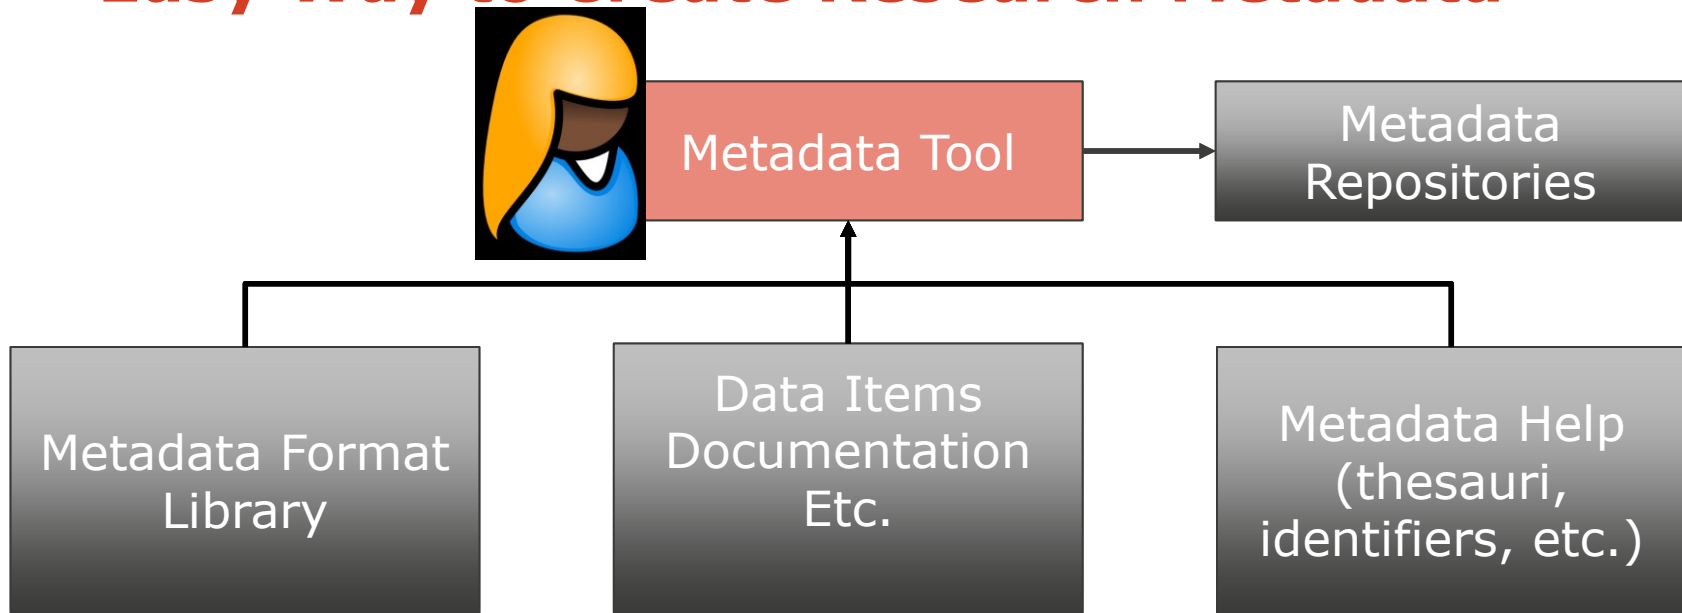

- **Tajua** project is a part of the Open Science and Research Initiative (ATT, <http://openscience.fi>)
- Focus on domestic output of science
- Sept 2015 – March 2017
- 6 work packages
- 4.5 employees

Tajua Improves Tools and Processes

- 1. Researcher:** Research data metadata tool
- 2. Admin:** How to manage Gold OA
- 3. Admin:** Repository Services Made Easy
- 4. Sysadmin:** Best practices on metadata, statistics, etc.
- 5. Librarian:** Long-term access to open materials
- 6. Librarian:** Identifier and authority services

Research Data Metadata Tool

Easy Way to Create Research Metadata

How to Support OA Publishing: A Report

- Processes in universities
- How to manage APCs
(local and national funds, etc.)
- Costs of “full Gold Open Access”
- In Finnish: <http://urn.fi/URN:NBN:fi-fe201603308918>

How to Support OA Publishing: A Report

- Golden OA is financially feasible
- Better data from publishers needed
- Better in-house data needed

Repository Services Made Easy

- Easy and cheap to implement and use
- Based on existing services at the National Library (45 paying customers)
- “No excuses for not having a repository”

Best Practices for Repository Admins

- Common metadata practices
 - Especially in DSpace environment
- Best practices for CC and other licences
- Commensurable & consistent statistics

Long Term Availability of Scientific Output

- Discussions underway with e.g. Finnish scientific publishers
- Cooperation with the Federation of Finnish Learned Societies

Identifier and Authority Services

- Implementation of ISNI identifiers
 - For authorities
 - Complement Orcids
- URN Identifiers
 - Improvements in existing services
