

# DUMP THE DUMP

and keep your students engaged in their learning

The Problem

Have you ever taken this course?

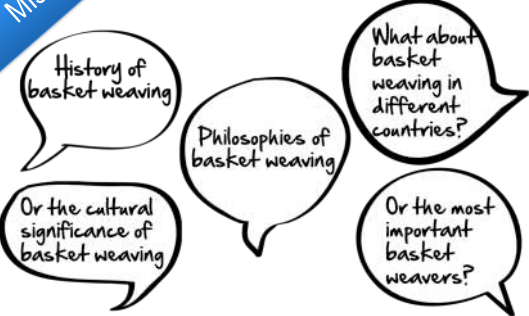

## INFORMATION DUMP

Why does this happen?

Mistake #1

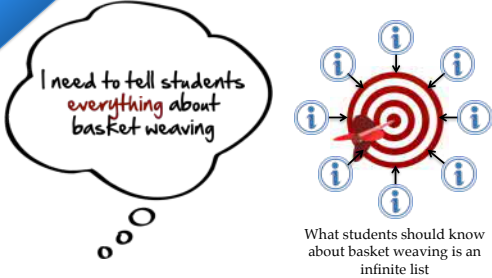

"What do students need to know?"

- History of basket weaving
- Philosophies of basket weaving
- What about basket weaving in different countries?
- Or the cultural significance of basket weaving
- Or the most important basket weavers?

Mistake #2

Teaching = Coverage

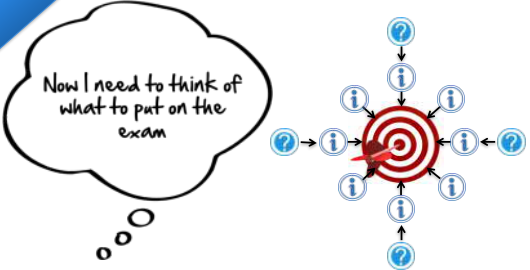

I need to tell students *everything* about basket weaving

What students should know about basket weaving is an infinite list

Mistake #3

Present information first.  
Think of assessment afterwards.

Now I need to think of what to put on the exam

The Result

Our Learner

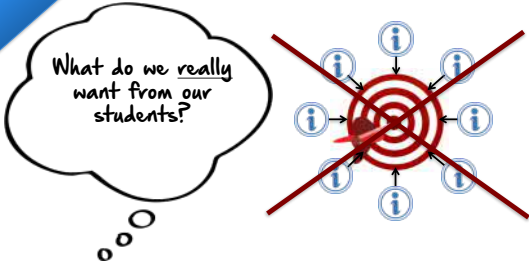

**The Result**

Our Learner

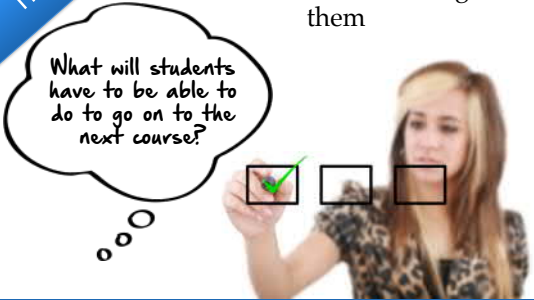

**The Objective**

We don't want students to repeat to us what we told them

**The Objective**

We want students to do things with the information we give them

What will students have to be able to do to go on to the next course?

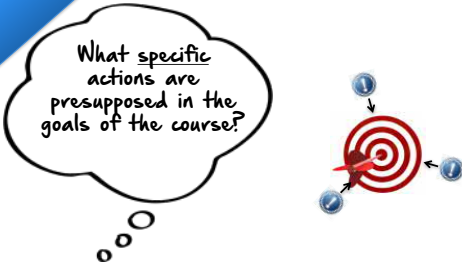

**Step 1**

Identify aims of the course

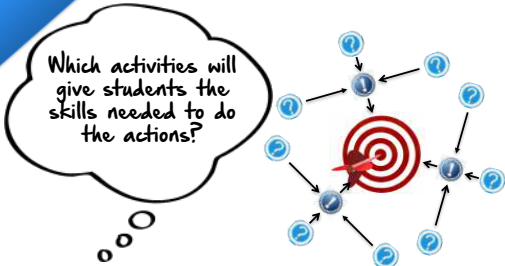

**Step 2**

Transform aims into actions

**Step 3**

Design practice activities

**Step 4** Identify the essential information

What information do students really need to have in order to do the activities?

**p**

voiceless bilabial plosive

**Voicing**  
 voiceless  voiced

**Place**  
 bilabial  
 labiodental  
 dental  
 alveolar  
 postalveolar  
 retroflex  
 palatal  
 velar  
 uvular  
 pharyngeal  
 glottal

**Manner**  
 plosive  
 nasal  
 fricative  
 approximant

 Final Answer

Question goes here

A: Correct    B: Incorrect  
 C: Incorrect    D: Incorrect

Labov's Department Store Study

### Preparing Data for Analysis

Indigest data

Import the data and save to an object called `ipgn`. The data is found at the following web address:  
<https://www.kaggle.com/labov/department-store-study>

Code | 1 view

Inspect the data

Use the `glimpse()` function to get an overview of the data
